NCA STATISTICS ANNUAL REPORT 2022

Farm and City Attacks effects all of us in South Africa. Farm Attacks include attacks on smallholdings/plots on the property of inhabitants/owners. City Attacks include all attacks in cities or towns on the premises or yard of the occupants/owners. An incident is classified as an attack when the occupants/owners of the premises/yard/property are present and physically assaulted or forced to take any action against their voluntary sense by someone who does not reside at the same address.

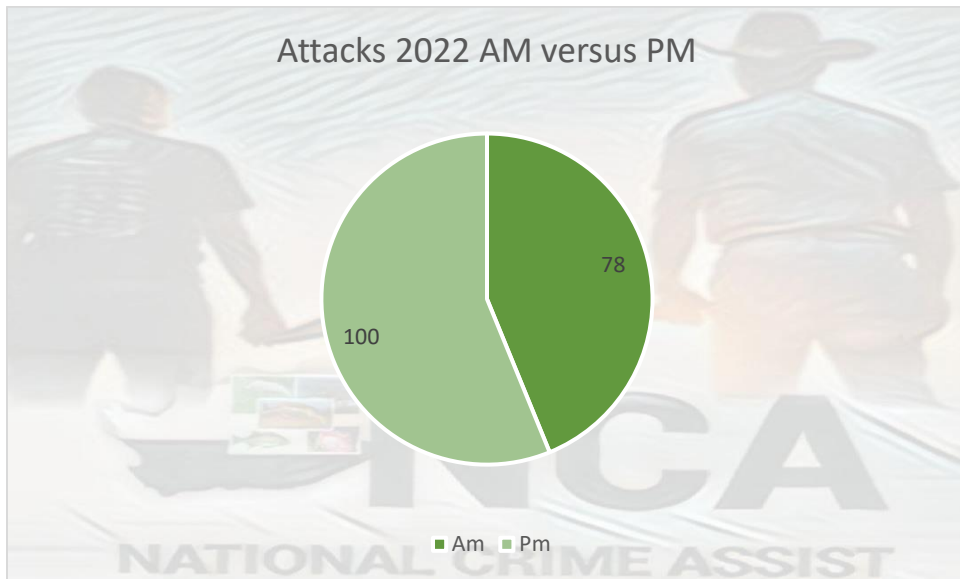

All Attacks are verified with Source references, however, there are many Attacks not presented to the public by the Media and the figures may therefore be higher. The modis operandi of Farm and City Attacks is the same and innocent people are traumatized, assaulted or killed. The sad truth that children have to live through such an ordeal. The impact on our society unimaginable leaving traumatized victims.

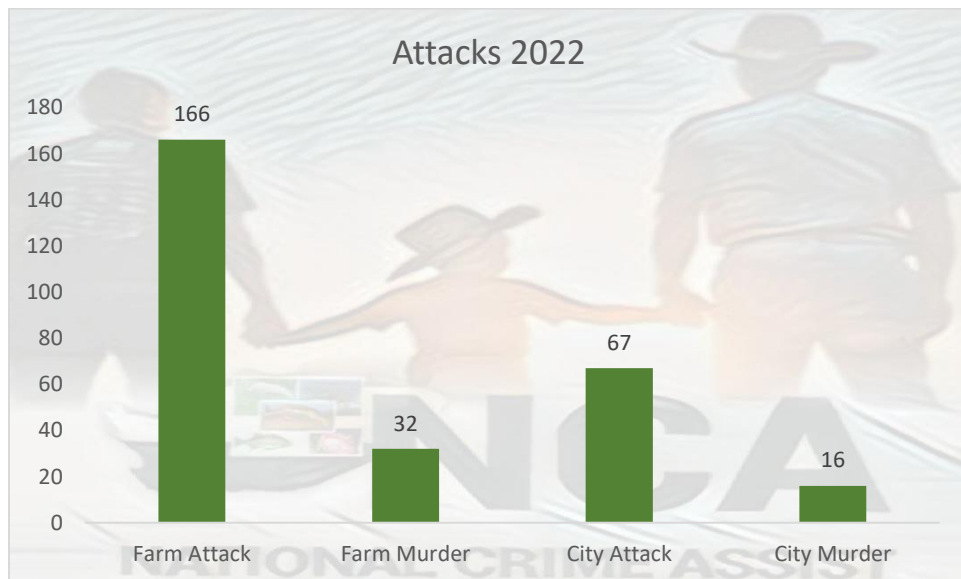

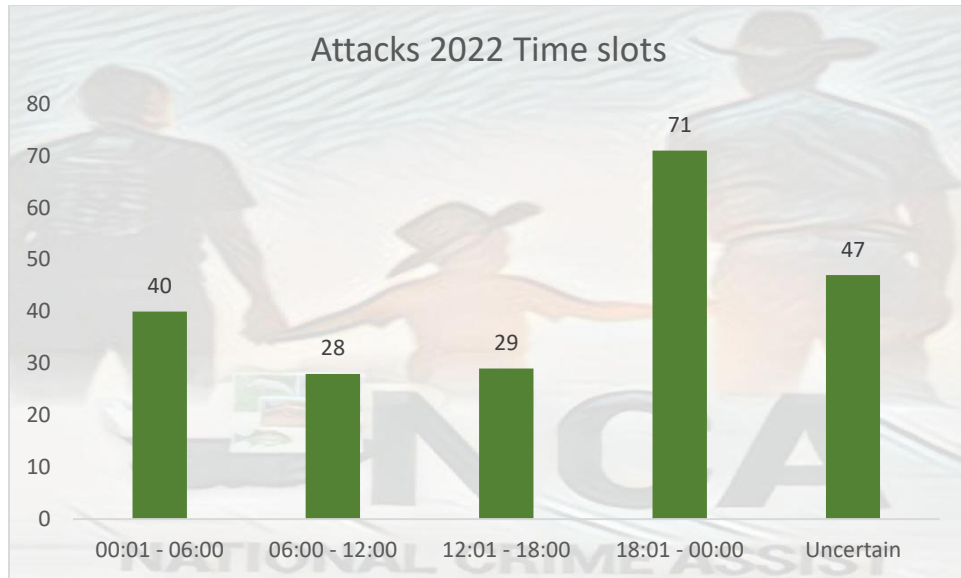

Attacks take place every day of the week.

Most attacks in 2022 took place between noon and midnight.

There were more than 285 victims traumatized, assaulted or murdered by more than 424 attackers. In 83 attacks the attackers were armed with guns, in 53 attacks the attackers were armed with sharp objects such as pangas, knives or screwdrivers. In 29 attacks the attackers were armed with blunt objects.

19 Vehicles were stolen and 9 vehicles were recovered. Lately in December the attackers took the victims car keys in more than one attack.

More than 37 weapons were stolen during attacks of which 9 was recovered. Cash, jewelry, weapons, cellphone, flat screen TV's and laptops are mostly stolen. Sad truth that a human life was taken for only R40 and 2 cellphones during December 2022 ...

Stay safe! Be vigilant! Rather be pro-active than reactive!
